

MIG Customer Story

Costs Reduced by Moving Microsoft GP to the Cloud

Overview

Country: United States

Industry: Remodeling

Customer Profile

For over 25 years, Central Supply Company has built a reputation for reliability and service in the Central Florida Cabinet Industry

Business Situation

Central Supply was on a very old version of Microsoft Dynamics GP. They wanted to move to a cloud solution for better support and a more stable environment.

Solution

MIG & Co upgraded their installation to the current version of Microsoft GP.

Benefits

- Eliminated onsite hardware
- More stable environment with no downtime

For More Information

"Our new cloud-based solution has eliminated the incremental updates to old software."

Judy Baldyga, Vice-President, Central Supply Company

Business Needs

With the business on a growth path after recovering from a downturn in the construction industry, Central Supply Company wanted to upgrade from the older version of Microsoft Great Plains which had been installed in 2002 and was running on premise.

They wanted to upgrade to the latest version of GP and move the installation to the cloud for a more stable and reliable environment.

The Solution

MIG & Co. brought Central Supply Company's solution up to date while migrating them to the cloud. The company went from running Microsoft GP version 9 to the current 2018 version.

“The MIG & Co. team provided clear communication throughout the entire upgrade process.”

Judy Baldyga,
Central Supply Company
Vice-President

Eliminate Incremental Upgrades

Moving the GP installation from on-premise to the cloud eliminated the need to make incremental upgrades to old software, saving time and resources.

Improve Cash Flow

A cloud-based solution converts a capital expense to an operational expense.

Central Supply Company no longer has to maintain hardware, software, and infrastructure on site to support their Microsoft Great Plains Solution.

They now have the reliability of a monthly cost without the need to incur SQL, Windows, server maintenance charges.

Reduce Dependence on Outsourced IT

The Central Supply team uses an outsourced IT staff. Moving Dynamics GP to the cloud eliminates the need to engage the IT team for system upgrades. Central Supply will now be able to stay up to date and take advantage of all new features without bringing in the external IT staff.

Knowledgeable and Responsive MIG & Co Team

When considering a partner to implement the migration, Central Supply Company reached out to several vendors. According to Judy Badyga, Central Supply Company Vice-President, “We reached out to several companies online, and MIG & Co was the most responsive.”

MIG & Co. specializes in implementing and supporting industry leading financial and business applications that offer the lowest total cost of ownership.

Since 1998, our company's passion is to empower organizations to automate business processes and maximize productivity.

Summary

Central Supply Company liked the capabilities and communications from the MIG & Co. team. They provided clear and detailed documentation at the start of the migration project and continued the strong communication throughout the effort.

Central Supply Company now has better support and increased productivity with the cloud solution.

The Central Supply Company team is extremely happy with the speed and reliability of the new installation. They've experienced none of the system lockouts that were inherent in the previous on-premise solution.
